Welcome to the Drallim Group

The Drallim Group is an innovative British engineering company. With experience in providing comprehensive turnkey assembly & test solutions covering electronic, electromechanical, engineering and mechanical products we offer our customers a total contract manufacturing service. We are a leading innovator in design and manufacturing solutions, providing engineering skills, manufactured equipment & custom-built systems.

Many of the assemblies produced require wire and cable interconnection between boards and sub-assemblies. This can be via cable forms or point to point wiring. As part of our electro-mechanical assembly service we are often called on to produce products that require critical cable routing. We also undertake electrical wiring of switch and instrument panels plus sophisticated control cabinets. We have highly trained engineering and assembly teams to assist with design and the assembly and support for all your cable and loom requirements.

“Taking pride in overseeing the entire manufacturing process”

The Drallim Group

Company Profile

Established in 1958, Drallim Industries is one of the UK's leading award winning sub-contract manufacturers, providing a wide range of manufacturing services including design, prototyping and manufacturing.

Drallim has three specialist divisions – Industrial, Aerospace & Utilities

Aerospace

Our history in Aerospace goes back over 50 years, serving military and civil aviation. This has been expanded in recent years, by requirement and acquisition to include a wide range of cargo handling equipment, restraints, cables and control rods, component and assembly manufacture.

Industrial

The Industrial Division was born out of the innovative Rotary Selector Valve. Originally launched in 1957, the ground breaking device still remains in demand today. Complemented over the years by a diverse range of products including electrical, pneumatic & hydraulic control panels, mechanical cables and control rods, specialist test equipment and a general electro-mechanical/mechatronic contract design manufacture and test service.

Utilities

The Utilities Division designs, manufactures and installs a wide variety of remote monitoring systems to the power and telecommunications industries. We have considerable expertise in providing an extensive range of field based monitoring and diagnostic condition monitoring equipment for cable network and power transformer operators.

The Drallim Group

Leading innovators in technology and quality

We recognise the importance of quality and are committed towards maintaining our Quality Management System to the latest edition of AS9100 incorporating BS EN ISO 9001 along with our Health and Safety OHSAS 18001 and ISO 14001 Environmental certification.

Our sub-contract expertise has been utilised across all our divisions and many industries which include Military, Rail, Marine, Petrochemical and Nuclear.

Cable Assemblies

As a specialist UK based cable assembly manufacturer with over 40 years' manufacturing experience, we are well-established as a reliable supplier of the highest quality cable assemblies and are able to produce a vast range of cable assemblies.

*“Ensuring a
Reliable
Connection Every
Time”*

The Drallim Group

Leading innovators in technology and quality

We are experienced with handling most cable and connector types, and have specialist equipment for coax, ribbon and flat cable among others.

We have worked within a wide range of industries, including Military, Aerospace, Rail, Telecommunications and high end industrial applications.

We can produce cable assemblies for almost any application from simple designs to complex bespoke forms. We can also provide wire stripping, marking, tinning and termination to meet your individual requirements.

Our high quality manufacturing and testing programme ensures you can trust us to provide a reliable final product.

Drallim are able to provide a complete service from design, prototyping through to full production.

Wiring Harness & Looms

Drallim has manufacturing experience that enables us to manufacture a diverse range of large multi-connector harnesses and looms, which are carefully assembled and laid out onto custom pin boards to ensure a perfect fit every time.

Our flexible approach means we can supply quantities ranging from one-off prototypes, through to small and large run volumes.

Our unique blend of experience in mechanical and electronic engineering means we can give practical advice for design and development.

Due to our wide-ranging electrical/electronic cabling experience combined with strong supply chain management, we make an ideal manufacturing partner.

Box & Panel Build

Drallim provides its clients with a full electrical and mechanical box and panel build assembly service. We have extensive experience in manufacturing boxes, cabinets, control panels, racks, and enclosures.

Our services are highly adaptable to meet the demands of the individual customer and can be built to your exact specifications.

Our engineering team can provide support for all box & panel builds, build-to-print, and bespoke solutions. We will collaborate from the early stages of development, provide prototyping, and ensure quality throughout the process from concept to delivery.

Drallim are dedicated to quality assurance and process improvement and follow an in-depth programme of continuous improvement to ensure our customers get the best quality and service they expect from a contract manufacturer.

Box & Panel Build

“We can build, integrate and wire a multitude of cabinet sizes, from small control cabinets to full height 19" racks”

Our expertise has been utilised across many industries including Aerospace, Defence, Energy, Marine, Rail and general industrial markets.
